

TITLE 49 - TRANSPORTATION

SUBTITLE A - OFFICE OF THE SECRETARY OF TRANSPORTATION

PART 24 - UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION FOR FEDERAL AND FEDERALLY - ASSISTED PROGRAMS

subpart b - REAL PROPERTY ACQUISITION

<http://cfr.vlex.com/vid/24-103-criteria-for-appraisals-19940454>

**24.103 - Criteria for appraisals.**

(a) Appraisal requirements. This section sets forth the requirements for real property acquisition appraisals for Federal and federally-assisted programs. Appraisals are to be prepared according to these requirements, which are intended to be consistent with the Uniform Standards of Professional Appraisal Practice (USPAP). 1 (See appendix A, 24.103(a).) The Agency may have appraisal requirements that supplement these requirements, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisition (UASFLA). 2 (1) The Agency acquiring real property has a legitimate role in contributing to the appraisal process, especially in developing the scope of work and defining the appraisal problem. The scope of work and development of an appraisal under these requirements depends on the complexity of the appraisal problem.

1 Uniform Standards of Professional Appraisal Practice (USPAP).

Published by The Appraisal Foundation, a nonprofit educational organization. Copies may be ordered from The Appraisal Foundation at the following URL: <http://www.appraisalfoundation.org/htm/USPAP2004/toc.htm>.

2 The Uniform Appraisal Standards for Federal Land Acquisitions is published by the Interagency Land Acquisition Conference. It is a compendium of Federal eminent domain appraisal law, both case and statute, regulations and practices. It is available at <http://www.usdoj.gov/enrd/land-ack/toc.htm> or in soft cover format from the Appraisal Institute at <http://www.appraisalinstitute.org/econom/publications/Default.asp> and select Legal/Regulatory or call 8885704545.

(2) The Agency has the responsibility to assure that the appraisals it obtains are relevant to its program needs, reflect established and commonly accepted Federal and federally-assisted program appraisal practice, and as a minimum, complies with the definition of appraisal in 24.2(a)(3) and the five following requirements: (See appendix A, 24.103 and 24.103(a).)

(i) An adequate description of the physical characteristics of the property being appraised (and, in the case of a partial acquisition, an adequate description of the remaining property), including items identified as personal property, a statement of the known and observed encumbrances, if any, title information, location, zoning, present use, an analysis of highest and best use, and at least a 5-year sales history of the property. (See appendix A, 24.103(a)(1).)

(ii) All relevant and reliable approaches to value consistent with established Federal and federally-assisted program appraisal practices.

If the appraiser uses more than one approach, there shall be an analysis and reconciliation of approaches to value used that is sufficient to support the appraiser's opinion of value. (See appendix A, 24.103(a).)

(iii) A description of comparable sales, including a description of all relevant physical, legal, and economic factors such as parties to the transaction, source and method of financing, and verification by a party involved in the transaction.

(iv) A statement of the value of the real property to be acquired and, for a partial acquisition, a statement of the value of the damages and benefits, if any, to the remaining real property, where appropriate.

(v) The effective date of valuation, date of appraisal, signature, and certification of the appraiser.

(b) Influence of the project on just compensation. The appraiser shall disregard any decrease or increase in the fair market value of the real property caused by the project for which the property is to be acquired, or by the likelihood that the property would be acquired for the project, other than that due to physical deterioration within the reasonable control of the owner. (See appendix A, 24.103(b).)

(c) Owner retention of improvements. If the owner of a real property improvement is permitted to retain it for removal from the project site, the amount to be offered for the interest in the real property to be acquired shall be not less than the difference between the amount determined to be just compensation for the owner's entire interest in the real property and the salvage value (defined at 24.2(a)(24)) of the retained improvement.

(d) Qualifications of appraisers and review appraisers. (1) The Agency shall establish criteria for determining the minimum qualifications and competency of appraisers and review appraisers. Qualifications shall be consistent with the scope of work for the assignment. The Agency shall review the experience, education, training, certification/licensing, designation(s) and other qualifications of appraisers, and review appraisers, and use only those determined by the Agency to be qualified.

(See appendix A, 24.103(d)(1).) (2) If the Agency uses a contract (fee) appraiser to perform the appraisal, such appraiser shall be State licensed or certified in accordance with title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) (12 U.S.C. 3331 et seq.).

[70 FR 611, Jan. 4, 2005, as amended at 70 FR 22611, May 2, 2005]

#### **§ 24.104 Review of appraisals.**

<http://cfr.vlex.com/vid/24-104-review-appraisals-19940459>

The Agency shall have an appraisal review process and, at a minimum:

(a) A qualified review appraiser (see §24.103(d)(1) and appendix A, §24.104) shall examine the presentation and analysis of market information in all appraisals to assure that they meet the definition of appraisal found in 49 CFR 24.2(a)(3), appraisal requirements found in 49 CFR 24.103 and other applicable requirements, including, to the extent appropriate, the UASFLA, and support the appraiser's opinion of value. The level of review analysis depends on the complexity of the appraisal problem. As needed, the review appraiser shall, prior to acceptance, seek necessary corrections or revisions. The review appraiser shall identify each appraisal report as recommended (as the basis for the establishment of the amount believed to be just compensation), accepted (meets all requirements, but not selected as recommended or approved), or not accepted. If authorized by the Agency to do so, the staff review appraiser shall also

approve the appraisal (as the basis for the establishment of the amount believed to be just compensation), and, if also authorized to do so, develop and report the amount believed to be just compensation. (See appendix A, §24.104(a).)

(b) If the review appraiser is unable to recommend (or approve) an appraisal as an adequate basis for the establishment of the offer of just compensation, and it is determined by the acquiring Agency that it is not practical to obtain an additional appraisal, the review appraiser may, as part of the review, present and analyze market information in conformance with §24.103 to support a recommended (or approved) value. (See appendix A, §24.104(b).)

(c) The review appraiser shall prepare a written report that identifies the appraisal reports reviewed and documents the findings and conclusions arrived at during the review of the appraisal(s). Any damages or benefits to any remaining property shall be identified in the review appraiser's report. The review appraiser shall also prepare a signed certification that states the parameters of the review. The certification shall state the approved value, and, if the review appraiser is authorized to do so, the amount believed to be just compensation for the acquisition. (See appendix A, §24.104(c).)

## **Appendix A to Part 24 - Additional Information**

Section 24.103(a) Appraisal requirements. The first sentence instructs readers that requirements for appraisals for Federal and federally-assisted programs or projects are located in 49 CFR part 24.

These are the basic appraisal requirements for Federal and federally-assisted programs or projects. However, Agencies may enhance and expand on them, and there may be specific project or program legislation that references other appraisal requirements.

These appraisal requirements are necessarily designed to comply with the Uniform Act and other Federal eminent domain based appraisal requirements. They are also considered to be consistent with Standards Rules 1, 2, and 3 of the 2004 edition of the USPAP. Consistency with USPAP has been a feature of these appraisal requirements since the beginning of USPAP. This consistent relationship was more formally recognized in OMB Bulletin 9206. While these requirements are considered consistent with USPAP, neither can supplant the other; their provisions are neither identical, nor interchangeable. Appraisals performed for Federal and federally-assisted real property acquisition must follow the requirements in this regulation. Compliance with any other appraisal requirements is not the purview of this regulation. An appraiser who is committed to working within the bounds of USPAP should recognize that compliance with both USPAP and these requirements may be achieved by using the Supplemental Standards Rule and the Jurisdictional Exception Rule of USPAP, where applicable.

The term scope of work defines the general parameters of the appraisal.

It reflects the needs of the Agency and the requirements of Federal and federally-assisted program appraisal practice. It should be developed cooperatively by the assigned appraiser and an Agency official who is competent to both represent the Agency's needs and respect valid appraisal practice. The scope of work statement should include the purpose and/or function of the appraisal, a definition of the estate being appraised, and if it is fair market value, its applicable definition, and the assumptions and limiting conditions affecting the appraisal. It may include parameters for the data search and identification of the technology, including approaches to value, to be used to analyze the data. The scope of work should consider the specific requirements in 49 CFR 24.103(a)(2)(i) through (v) and address them as appropriate.

Section 24.103(a)(1). The appraisal report should identify the items considered in the appraisal to be real property, as well as those identified as personal property.

Section 24.103(a)(2). All relevant and reliable approaches to value are to be used. However, where an Agency determines that the sales comparison approach will be adequate by itself and yield credible appraisal results because of the type of property being appraised and the availability of sales data, it may limit the appraisal assignment to the sales comparison approach. This should be reflected in the scope of work.

Section 24.103(b) Influence of the project on just compensation. As used in this section, the term project means an undertaking which is planned, designed, and intended to operate as a unit.

When the public is aware of the proposed project, project area property values may be affected. Therefore, property owners should not be penalized because of a decrease in value caused by the proposed project nor reap a windfall at public expense because of increased value created by the proposed project.

Section 24.103(d)(1). The appraiser and review appraiser must each be qualified and competent to perform the appraisal and appraisal review assignments, respectively. Among other qualifications, State licensing or certification and professional society designations can help provide an indication of an appraiser's abilities.

Section 24.104 Review of appraisals. The term review appraiser is used rather than reviewing appraiser, to emphasize that review appraiser is a separate specialty and not just an appraiser who happens to be reviewing an appraisal. Federal Agencies have long held the perspective that appraisal review is a unique skill that, while it certainly builds on appraisal skills, requires more. The review appraiser should possess both appraisal technical abilities and the ability to be the two-way bridge between the Agency's real property valuation needs and the appraiser.

Agency review appraisers typically perform a role greater than technical appraisal review. They are often involved in early project development.

Later they may be involved in devising the scope of work statements and participate in making appraisal assignments to fee and/or staff appraisers. They are also mentors and technical advisors, especially on Agency policy and requirements, to appraisers, both staff and fee.

Additionally, review appraisers are frequently technical advisors to other Agency officials.

Section 24.104(a). This paragraph states that the review appraiser is to review the appraiser's presentation and analysis of market information and that it is to be reviewed against 24.103 and other applicable requirements, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisition. The appraisal review is to be a technical review by an appropriately qualified review appraiser. The qualifications of the review appraiser and the level of explanation of the basis for the review appraiser's recommended (or approved) value depend on the complexity of the appraisal problem. If the initial appraisal submitted for review is not acceptable, the review appraiser is to communicate and work with the appraiser to the greatest extent possible to facilitate the appraiser's development of an acceptable appraisal.

In doing this, the review appraiser is to remain in an advisory role, not directing the appraisal, and retaining objectivity and options for the appraisal review itself.

If the Agency intends that the staff review appraiser approve the appraisal (as the basis for the establishment of the amount believed to be just compensation), or establish the amount the Agency believes is just compensation, she/he must be specifically authorized by the Agency to do so. If the review appraiser is not specifically authorized to approve the appraisal (as the basis for the establishment of the amount believed to be just compensation), or establish the amount believed to be just compensation, that authority remains with another Agency official.

Section 24.104(b). In developing an independent approved or recommended value, the review appraiser may reference any acceptable resource, including acceptable parts of any appraisal, including an otherwise unacceptable appraisal. When a review appraiser develops an independent value, while retaining the appraisal review, that independent value also becomes the approved appraisal of the fair market value for Uniform Act Section 301(3) purposes. It is within Agency discretion to decide whether a second review is needed if the first review appraiser establishes a value different from that in the appraisal report or reports on the property.

Section 24.104(c). Before acceptance of an appraisal, the review appraiser must determine that the appraiser's documentation, including valuation data and analysis of that data, demonstrates the soundness of the appraiser's opinion of value. For the purposes of this part, an acceptable appraisal is any appraisal that, on its own, meets the requirements of 24.103. An approved appraisal is the one acceptable appraisal that is determined to best fulfill the requirement to be the basis for the amount believed to be just compensation. Recognizing that appraisal is not an exact science, there may be more than one acceptable appraisal of a property, but for the purposes of this part, there can be only one approved appraisal.

At the Agency's discretion, for a low value property requiring only a simple appraisal process, the review appraiser's recommendation (or approval), endorsing the appraiser's report, may be determined to satisfy the requirement for the review appraiser's signed report and certification.
